

Annual Network Review 2025

This annual review covers the network operator's capacity, reliability and pricing for the 2025 financial year.

Installed capacity reached 32.4 GW at the end of the year, up from 29.1 GW a year earlier, while peak demand was 27.8 GW on 14 January.

Unplanned outages fell to 1.9 percent of available hours, the lowest figure since the operator began publishing the series in 2016.

Tariffs and losses

The regulator approved a standing charge of 0.42 EUR per day for domestic customers, effective 1 April 2025.

Transmission losses were 2.1 percent of energy delivered, against a regulatory target of 2.5 percent.
