Prepared from the operations export and the 2026-09-30 decision

Decision

The steering group approved a two-week follow-up pilot, not a full rollout.

Evidence

- Request volume rose from 80 to 100 per day (+25%).
- Median response time fell from 12 to 9 hours (−25%).
- Error rate rose from 2% (8 of 400) to 3% (15 of 500).

Risks

The comparison is observational: there was no random allocation and the customer mix differs, so the improvement is not causal evidence. The error rate rose.

Next steps

Ownership

Owner	Budget	Final review
Maya Okafor	EUR 2,400	2026-10-19

Stop the follow-up pilot if the error rate exceeds 4 percent.
